

SO APPARENTLY I HAVE
THIS
OLD PC LAYING AROUND
FOR 3 YEARS
SO I DECIDED TO MAKE
A SERVER WITH IT

?!
SO I CHECKED ABOUT HOW I
CAN MAKE IT THEN I FOUND
PEOPLE HAVE A DEDICATED
HOBBY ON THIS CALLED SELF
HOSTING AND HOME LABING

SO THAN I THOUGHT WHY
WON'T WE HAVE OUR OWN
SINCE I ALREADY HAVE A OLD
PC DOING NOTHING

SO I DECIDED TO OPEN MY
MY PC AND TAKE A PECK AT
IT

SO AS I OPENED MY
OLD PC AND IS PRETTY
DUSTY AND UNCLEAR
SO I CLEAN IT
CAREFULLY REMOVED
ALL PARTS OUT

SO THEN I FIND IT IS
RUNNING ON A OLD HDD
AND IT IS NOT BAD FOR
SERVERS BUT I
THOUGHT IS BETTER BUY
A SSD BECAUSE THIS
HDD IS THE MAIN
REASON I STOPPED
USING MY PC

?

SO I THOUGHT
WILL IT ALSO RUN
ON A OS.....?

THEN WHEN I CHECKED I
FIND SOME THING LIKE
PROXMOX BASICALLY IT IS OS
WHICH LETS US USE SOME
VIRTUAL OS'S IN IT

SINCE IT IS MY FIRST TIME I
DECIDE TO INSTALL ONLY ONE
OS SO I CHECK FOR SOME
OS'S.....

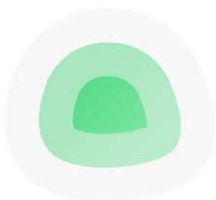

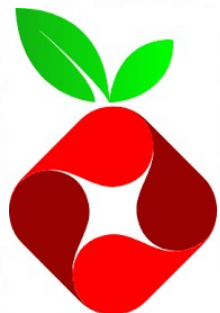

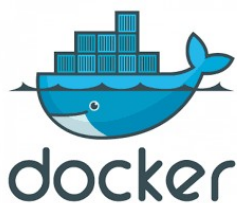

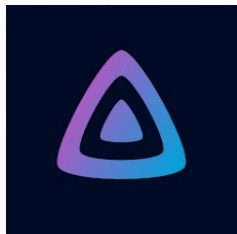

AND..... I FIND A PERFECT
ONE FOR ME IT IS CALLED AS
UBUNTU

THIS IS A OS WHICH DO
ALMOST ALL SERVICES AND
USED BY MAIN SELF
HOSTING YOUTUBERS SO I
DECIDED TO GO WITH IT

SO THEN I THINK SO
DEEP FOR WHAT SERVICES
I SHOULD ADD.....

AND THEN I FIND MANY
SERVICES THAT WHICH
MAKES MY BRAIN
EXPLODE

AND I FIND IT KINDA
EXCITING TO
DO
SO.....

.....THAT'S IT FOR THIS
EPISODE MEET YOU IN
NEXT ONE BYE
